Glow67 Pro Series
24VDC IP67 Dotless High-Power LED Tape

Cutting

Find the corresponding cutting mark according to the length requirements, and then use a knife to cut open the top silicone jacket.

Bend the strip slightly upwards, and cut it along the inner PCBA's cutting line exposed from the opening with scissors.

Tape to tape connector

1X
Upper cover of extension connector

1X
Lower cover of extension connector

1X
Conductive connection plate

1 Insert the conductive connection plate into the bottom of the PCBA of the two strip lights, and leave 2mm[0.08in.] outside in the middle.

2 Fix the two strip lights on the lower cover and align the limit structure.

3 Apply an appropriate amount of glue to the reserved 2mm[0.08in.] slot and fill the grooves and gaps.

4 Put the upper cover onto the bottom cover.

5 Fasten the upper cover to the lower cover by plier, until the buckle is installed in place.
